

CALL FOR PAPERS

IGARSS 2014 and 35th CSRS Special Issues

IEEE J-STARS and CJRS

Submission Due Date: September 30, 2014

The 2014 *International Geoscience and Remote Sensing Symposium* (IGARSS 2014) is being held in conjunction with the 35th *Canadian Symposium on Remote Sensing* (CSRS) in Québec City, Canada, from July 13th to July 18th. This joint Symposium is a partnership of the IEEE Geoscience and Remote Sensing Society (GRSS) and the Canadian Remote Sensing Society (CRSS).

Two special issues in peer-reviewed journals are planned:

- *IEEE Journal of Selected Topics in Applied Earth Observations and Remote Sensing* (J-STARS).
Editor-in-Chief: Dr. Jocelyn Chanussot (Grenoble Institute of Technology)
- *Canadian Journal of Remote Sensing / Journal canadien de télédétection* (CJRS-JCT).
Editor-in-Chief: Dr. Nicholas Coops (UBC)

For both special issues, normal page charges, peer-review, and editorial process will apply. The paper submission deadline is **September 30, 2014** with a target publishing date in early 2015.

Please note: Papers submitted to J-STARS or to CJRS should NOT be the conference paper. A 2 to 3 times longer paper is typically expected, with a more detailed presentation of the work, and possibly to include additional data sets and comparisons in an enhanced experimental section. To avoid confusion in future referencing, a different title should also be chosen.

IEEE J-STARS Special Issue:

All authors are invited to submit full length manuscripts for peer review for the J-STARS special issue. However, papers close to the symposium theme "*Energy and our Changing Planet*" will be invited to submit to the CJRS Special Issue (details below). Papers for the J-STARS special issue will consider all other symposium topics and should be submitted online via the [IEEE/Xplore Spectral Library](http://mc.manuscriptcentral.com/jstars) or directly to <http://manuscriptcentral.com/jstars>. Authors should indicate that the paper is planned for the IGARSS 2014 special issue in J-STARS.

J-STARS Guest Editors: Dr. Josée Lévesque (DRDC), Dr. Monique Bernier (INRS),
Dr. Ellsworth LeDrew (University of Waterloo) and Dr. Jean-Marc Garneau, (DRDC, Ret.)

CJRS Special Issue:

Authors who address a subject close to the symposium theme "*Energy and our Changing Planet*" including the current or future role of remote sensing in topics such as energy management, oil, gas and mineral exploration and renewable energy are invited to submit to the *Canadian Journal of Remote Sensing/Journal canadien de télédétection* special issue.

Papers should be submitted to <http://mc.manuscriptcentral.com/cjrs-jct> indicating in the cover letter that the paper is for the IGARSS 2014 / 35th CSRS special issue in CJRS. Prospective authors should follow the regular guidelines of the CJRS available at that site.

CJRS Guest Editors: Dr. Danielle De Sève (IREQ) and Dr. Josée Lévesque (Defence R&D Canada)
